WELCOME
We welcome Rinat Akther from Bangladesh, who will be with us for the next 4 years, while she completes her PhD. Rinat is working under the supervision of Dr. Clare McGrory and Prof. You-Gan Wang.

EVENTS
Dr. Clare McGrory and A. Prof. Anthony J. Richardson presented two successful R workshops in July. Anthony’s workshop – an introduction to R – ran for three days from July 21-23, 2014 and Clare’s two-day workshop for more advanced R users, followed on July 24-25. Together, the workshops had over 60 registrants and there is talk of potentially holding another R workshop in November.

During the month, CARM staff met with members of DSITIA (Department of Science, Information Technology, Innovation and the Arts) for a half day networking workshop. Members from Aquatic Ecosystem Health, Water Quality and Investigations, and Water Assessment & Systems were on hand to discuss possible collaboration opportunities for water and other environmental research.

PUBLICATIONS
Prof. You-Gan Wang and Dr. Liya Fu’s paper "Statistical Tools for Analyzing Water Quality Data" has achieved impressive readership results. The chapter which is published with InTech in the book "Water Quality Monitoring and Assessment" has so far been accessed 5000 times.

The top downloads of the paper are from the following five countries:
- United States of America
- China
- India
- Brazil
- Canada

Other publications this month include two from Dr. Clare McGrory and one from Dr. Peter Baxter:
